NAVNEET SHENDE

Customer Success Engineer | Technical Account Manager | Bug Triage
social.iamnavneet@gmail.com | +971 52 366 9785 | Dubai, UAE | linkedin.com/in/navneet-s-2a69a91a9

SUMMARY

Technical Account Manager with 5+ years debugging production platforms for enterprise users: reproduce the issue, trace the root cause through logs, network traffic and database queries, and escalate real defects to engineering with evidence. Resolved 500+ P1/P2 incidents in a year at a ~2 hr average, restored push delivery from 65% to 90%, and found an IDOR in the e& iOS SDK tied to 6.5M users. Builds with LLM APIs (Claude) and writes runbooks that cut repeat issues.

CORE SKILLS

- **Debugging & Triage:** bug reproduction, root cause analysis, separating user error from system defects, escalation to engineering, SOPs and runbooks
- **Logs & Telemetry:** Nginx, SigNoz, New Relic, Sumo Logic; HTTP 4xx/5xx analysis across live and compressed logs
- **APIs & Web Stack:** REST, Postman, JSON, webhooks, payload and auth validation, Android/iOS SDK testing, Node.js services (Sequelize)
- **Databases:** MongoDB, PostgreSQL (Percona/Citus), Redis, SQL
- **AI:** LLM API integration (Claude), prompt engineering; built an AI companion app prototype (Claude API, ElevenLabs)
- **Platform:** AWS (EC2, S3), Linux (Ubuntu/CentOS), Burp Suite, Nmap, Wireshark

PROFESSIONAL EXPERIENCE

Technical Account Manager — AppICE (e& UAE / Smiles UAE) **Dubai, UAE | Aug 2024 – Present**

- Resolved **500+ P1/P2 incidents in a year** at a **~2 hr average** by reproducing issues, tracing root cause across logs and databases, and escalating true defects to engineering with evidence.
- Corrected campaign analytics **overstated by ~5% across 1,000+ campaigns** by tracing a duplicate-row bug from concurrent worker processing in distributed PostgreSQL and driving the engineering fix.
- Restored push-notification delivery **from 65% to 90%** across ~30 campaigns by correlating CDN, Nginx and SigNoz logs by timestamp to isolate the cause.
- Closed an **IDOR vulnerability in the e& iOS SDK tied to 6.5M users** by finding it in API and SDK testing, reporting it, and tracking remediation to release.
- Caught malformed payloads and auth defects before production by testing campaign-triggering REST APIs and Android/iOS SDK integrations.
- Reported monthly campaign performance across **2,000+ campaigns** to e& and Smiles stakeholders, turning technical findings into plain-language guidance.

Technical Support Engineer — Acquia Inc. **India | Jan 2023 – Aug 2024**

- Delivered 24/7 enterprise support in SLA-driven environments, resolving P1/P2 incidents and customer escalations.
- Ran root-cause analysis on failures and performance degradation using New Relic and Sumo Logic, and reported findings to stakeholders.
- Built SOPs and lightweight automation scripts that reduced recurring incident volume.

Software Engineer — Simplify Healthcare **India | May 2021 – Jan 2023**

- Supported secure deployments, API integrations and backend services in HIPAA-compliant environments; triaged production issues, tuned performance, automated recurring workflows and maintained SOPs.

EDUCATION & CERTIFICATIONS

MS in Cybersecurity — Distinction | Middlesex University Dubai
BCA (Computer Science) — Distinction | BMCC, Pune, India
Certifications: Cisco — Endpoint Security | Oracle — Cloud Infrastructure Security
